Summary

Python developer focused on Agentic AI, LLM-powered applications, and scalable backend systems. Experienced in developing multi-agent workflows, retrieval-augmented generation (RAG) solutions, and full-stack applications using Python, LangChain, LangGraph, FastAPI, and modern databases. Brings hands-on software engineering experience across API development, database operations, AI-driven products, and smart-contract security.

Technical Skills

Programming Languages: Python, JavaScript, SQL, C++
Agentic AI and LLMs: LangChain, LangGraph, Multi-Agent Workflows, Retrieval-Augmented Generation (RAG), Vector Database, Embeddings, LLM Evaluation, Guardrails, LLM Gateways, Deep Agents, OpenAI API, Groq API, Hugging Face
Data Libraries: NumPy, Pandas, Matplotlib
Frameworks and Backend Technologies: FastAPI, React.js, Next.js, Node.js, Express.js
Databases: PostgreSQL, MongoDB, MySQL, Redis
Developer Tools and Platforms: Docker, Kubernetes, Linux, Git, Github Actions
Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, System Design

Work Experience

Ezwiiz Frontier Systems | FULL STACK DEVELOPER **Dec 2025 – Present**

- *Transitioned from internship to a full-time role, contributing to the development and maintenance of EzoHR, an HRMS platform serving approximately 150 businesses.*
- *Engineered full-stack features and optimized REST APIs and PostgreSQL operations to support business-critical HR workflows.*
- *Delivered 3 key platform capabilities — multilingual support, task management, and asset management — enhancing functionality for approximately 150 business clients.*

QuadB Technologies | BLOCKCHAIN DEVELOPMENT INTERN **Feb 2025 – Jun 2025**

- *Restructured and deployed more than 5 blockchain smart contracts, reducing transaction gas fees by 30%.*
- *Led a team of 4 developers in conducting more than 10 smart-contract audits, improving security compliance by 40%.*

Projects

CodeSage AI | AI-Powered Code Intelligence Platform
GitHub | Live Demo **Jun 2026**

- *Built a full-stack code intelligence platform using Next.js, FastAPI, PostgreSQL, LangGraph, and large language models (LLMs) for repository analysis and pull-request reviews.*
- *Designed multi-agent workflows for bug detection, security scanning, performance analysis, code refactoring, documentation generation, and automated test creation.*
- *Generated structured code-quality insights and review reports to support software engineering workflows.*

TutorialHub | AI-Powered Course Creation Platform
GitHub | Live Demo **May 2025**

- *Developed a full-stack application using React, Node.js, Clerk, and Gemini AI to generate educational courses, quizzes, and YouTube-integrated video lessons.*
- *Integrated Clerk authentication and Razorpay payment processing; generated more than 50 test courses.*

Imaginify | AI-Powered Image Enhancement Tool
GitHub | Live Demo **Apr 2024**

- *Composed an AI-assisted image enhancement tool for texture restoration, gap filling, and background removal, achieving a reported 70% clarity improvement across more than 200 images.*
- *Achieved a Lighthouse performance score above 95 across desktop and mobile, emphasizing responsive design and accessibility.*

Education

Punjab Technical University, Punjab, India **2021 – 2025**
*Bachelor of Technology in Computer Science | CGPA: **8.12/10***

Leadership Experience

Crosslinks – Club Handling Committee | President **Dec 2022 – Aug 2024**

- *Led more than 10 members and coordinated more than 4 inter-college technical events, increasing participation by 50%.*

TechzHut – Coding Club | Deputy President **Aug 2023 – Jun 2024**

- *Organized coding sessions and technical workshops for 100 students.*

Achievements

- *Won first place in the university-wide Spardha Sports Meet Chess Competition.*
- *Secured second place in solo singing at Aagaaz 2.0, the university's premier cultural festival.*
